

**Call for research proposals: The consolidation of systems biology research- stimulating the widespread adoption of systems approaches in biotechnology, biomedicine and agri-food**

**National Annexe: France – ANR, Agence Nationale de la Recherche**

ANR supports the ERASysBio 2<sup>nd</sup> Call for Proposals and encourages its systems biology research community to apply for funding for collaborative research in the European Research Area. This call is widely opened to any collaborative research projects in the area of biology, health, agriculture, environment and biotechnology. The official national call announcement will be published on ANR website, [www.agence-nationale-recherche.fr](http://www.agence-nationale-recherche.fr). Applicants are strongly advised to contact their National Programme Manager before preparing proposals for application to obtain the full national annexes: it is important to note that **non eligible research proposals will not be reviewed and in any case will not be funded by ANR.**

**Eligibility and national funding modalities**

Applicants from research organisations such as *organisme de recherche*, EPST, EPIC, universities... or from industries, large or SMEs are eligible to apply. The coordinator must belong to a public research organisation.

**Specific national regulations and guidelines** can be found on ANR website, at the following address:

<http://www.agence-nationale-recherche.fr/AAPProcedures?NodId=40&IngInfold=63>

**Each French partner of successful applications** will be funded by ANR according to the regulation and modalities that can be founded on the ANR website:

<http://www.agence-nationale-recherche.fr/AAPProcedures?NodId=40&IngInfold=63>

**National Programme Manager:**
